I. HIGHLIGHTS

*During the first five months of 1986, the number of unemployed in New Hampshire averaged 20,000.

*Total population, which is projected at 1,037,400 for Fiscal Year 1987, is expected to increase by 116,790 or 12.7 percent over the 1980 Census.

*The civilian labor force, continuing its rapid expansion, will have fifty-three percent of its concentration in Hillsborough and Rockingham counties.

*The civilian labor force is projected to reach 568,300 in FY 1987 which is a 25.1 percent increase over the 1980 Census.

*Unemployment rates are expected to average 4.9 percent for FY 1987. Coos and Strafford counties should, once again, have the highest rates with 7.0 and 6.8 percent unemployment respectively.

*The total number of individuals who will actually incur a period of unemployment in FY 1987 is projected to reach 99,030. The average number of long-term unemployed (15 weeks or more) persons is expected to reach 6,205 for FY 1987.

*The number of economically disadvantaged is estimated at 104,725 which is a 39.0 percent increase over the 1980 Census.

*The Permanent Mass Layoff and Plant Closing (PMLPC) project, currently being established, is a standardized automated approach to identifying and describing the impact of major permanent job cutbacks. The potential uses of this new program are assistance for displaced workers, placement strategies by occupation and identifying areas and industries on an economic downslide throughout the state.

II. DESCRIPTION OF AREA

The State of New Hampshire is one of six New England States in the Northeastern part of the United States. Under CETA in FY 1983 there were two CETA Prime Sponsors in the State with Hillsborough County as one Prime Sponsor and the remaining nine counties comprising the Balance of State as the other Prime Sponsor and they were administered by the New Hampshire Office of Employment and Training. Beginning in FY 1984 there was only one service delivery area, the State of New Hampshire, as designated by the Governor. In Fiscal Year 1985 and 1986 two service delivery areas existed similar to what was used in FY 1983. These same areas will exist for FY 1987.

New Hampshire shares its boundaries with the Province of Quebec to the north, the Connecticut River and the State of Vermont to the west, the State of Massachusetts to the south and the State of Maine and the Atlantic Ocean to the east. The State has seventeen miles of coastline along the Atlantic Ocean.

The average elevation in New Hampshire is 2,000 feet and over 75 percent of its 9,241 square miles is covered by forests. The southern section of the State consisting of Hillsborough, Merrimack, Rockingham and Strafford counties contains over seventy-one percent of the State's population.

The mountains in the north, the seacoast in the east and the many lakes and ponds throughout the state are all within easy reach from Concord, the State's capital. Concord is readily accessible from various Northeast major cities. Listed below are highway distances:

<u>From:</u>	<u>To Concord:</u>
Boston	70 miles
Montreal	240 miles
New Haven	174 miles
New York	250 miles
Portland	87 miles
Providence	110 miles

III. ECONOMIC TRENDS

The economic condition in New Hampshire continues to improve but at a slower rate. Table 26 indicates that per capita personal income growth between 1983 and 1984 for New Hampshire was 9.7 percent. Although this percentage increase is higher than what it was in the past, New Hampshire is now faring only three-tenths of a percentage point better than the national average in comparison to the three percentage points by which we were ahead last year. When comparing to the New England States, we are again losing ground with regard to our ranking. New Hampshire is tied for third with Rhode Island and eight-tenths of a percentage point below the New England average.

Total personal income growth for New Hampshire between 1983 and 1984 was almost one and a half percentage points higher than the national average and four-tenths of a percentage point higher than the New England average. Table 27 illustrates this along with other growth rates by industry for New England and the nation.

New Hampshire is still ranked first in percentage change with 11.8 in New England, but our lead is diminishing.

The following table serves to show the changing pattern in total wages shared by manufacturing and nonmanufacturing. Manufacturing experienced its first increase since 1980 with a full percentage point rise over 1983 to 40.3 percent. Preliminary totals for the first three quarters of 1985 indicate that manufacturing is on the downward slide once again.

Total Wages
New Hampshire
(Workers Covered by Unemployment
Compensation in Private Industry)

Year	Total	Manufacturing	Non-manufacturing	Percent of Total Mfg. Non-mfg.	
1974	\$1,912,311,974	\$ 815,835,934	\$1,096,476,040	42.7	57.3
1975	1,959,164,661	801,425,796	1,157,738,865	40.9	59.1
1976	2,260,558,803	950,208,803	1,310,350,000	42.0	58.0
1977	2,587,126,913	1,096,181,639	1,490,945,274	42.4	57.6
1978	3,041,007,264	1,281,209,453	1,759,797,804	42.1	57.9
1979	3,537,373,910	1,496,782,374	2,040,591,536	42.3	57.7
1980	3,957,283,436	1,684,829,094	2,272,454,342	42.6	57.4
1981	4,432,106,831	1,848,281,022	2,583,825,809	41.7	58.3
1982	4,846,866,740	1,941,164,597	2,905,702,143	40.0	60.0
1983	5,373,591,268	2,113,195,598	3,260,395,670	39.3	60.7
1984	6,056,202,213	2,440,873,428	3,615,328,785	40.3	59.7

IV. POPULATION AND LABOR FORCE DEMOGRAPHICS (TABLES 1-6)

Population in New Hampshire is projected to be approximately 1,037,400 during Fiscal Year 1987. This is an expected increase of 2.7 percent over the population projected for FY 1986. This growth will mainly occur in the southeastern part of the state, which is the most industrial.

The youth of the state, those whose age is 16 through 21, will total 101,912 for an estimated 9.8 percent of the population. The ratio of males to females in this group is almost identical. On the other hand, the elderly, those 65 years old and over, have a very distinct male to female ratio. The females will comprise 60.5 percent of the estimated 119,141 elderly, with the males at less than half or 39.5 percent. The largest age group will still be the 25-39 year olds with a total of 272,201, which is 26.2 percent of the 1987 projected population.

The civilian labor force is expected to reach 568,300 in the upcoming fiscal year. This is an increase of 3.3 percent over last year's projection. This particular group of people will be comprised of 54.9 percent male and 45.1 percent female.

The 25-34 year old age group will continue to have the largest percentage of the labor force with 28.4 percent of the total. The labor force participation rate rose four-tenths of a percentage point to 71.1 percent over last year's estimate. The youngest members of the labor force, 16-19 year olds, had the largest numerical increase with 9,014 over FY 1986.

More job opportunities continue to become available for the female worker during this decade than they have in the past. Some factors for the increase in the female participation rate are more employer flexibility for hours and benefits, including a mother's shift, large shopping malls with the various shifts to cover the hours of operation and the increase in the level of educational attainment allowing women to be more qualified for a greater variety of work.

V. INDUSTRIAL EMPLOYMENT (TABLES 8-13)

Table 8 indicates that the changes in industry percentages followed a similar trend when comparing New Hampshire statistics to those of the United States. The largest drop in nonagricultural employment occurred in manufacturing with a loss of 1.5 percentage points. Construction and mining registered the greatest gain at 6.8 percent, an increase of a full percentage point. Finance, insurance and real estate experienced a change in its percent distribution for the first time since 1982 with 5.4 percent of the nonagricultural employment. Government employment continues to decrease in its percent distribution.

The following table shows the relationship of New Hampshire with the United States and the other New England states in April 1986:

Employees on Nonagricultural and Manufacturing
Payrolls by Area (in thousands)

<u>Area</u>	<u>Total Nonagricultural</u>	<u>Manufacturing</u>	<u>Percent of Total</u>
United States	99,817.0	19,269.0	19.3
New England	6,157.7	1,444.1	23.5
Connecticut	1,597.6	406.8	25.5
Maine	462.2	103.3	22.3
Massachusetts	2,968.5	644.1	21.7
New Hampshire	480.2	121.3	25.3
Rhode Island	424.9	119.4	28.1
Vermont	224.3	49.2	21.9

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, May 1986.

New Hampshire's manufacturing percentage of the total nonagricultural employees as of April 1986 continues to be above the United States and New England percentages. In the New England area, Massachusetts has the largest number of manufacturing employees but the smallest percentage of manufacturing to the total for nonagricultural. New Hampshire is ranked third in both of the aforementioned categories. All of the New England states continue to decline in manufacturing statistics, as does the nation. The time period of 1970 through to April 1986, exemplifies this trend which is found in the table on the following page:

Percent

Manufacturing to Nonagricultural Employment

<u>Area</u>	<u>1970</u>	<u>1975</u>	<u>1980</u>	<u>April 1986</u>
U.S.	27.3	23.7	22.1	19.3
N.E.	27.2	27.2	27.8	23.5
N.H.	35.4	28.3	29.8	25.3

The following table shows the relationship of New Hampshire with the United States and the other New England states according to durable and nondurable goods in April 1986:

Employees on Durable and Nondurable Manufacturing
Payrolls by Area (in thousands)

<u>Area</u>	<u>Durable Goods</u>	<u>Nondurable Goods</u>
United States	11,447.0	7,822.0
New England	982.3	461.8
Connecticut	303.5	103.3
Maine	43.7	59.6
Massachusetts	434.3	209.8
New Hampshire	83.7	37.6
Rhode Island	81.8	37.6
Vermont	35.3	13.9

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, May 1986.

The employment in the durable goods industries accounted for 68.0 percent of the manufacturing employment in New England, down two-tenths of a percent from the previous year. Maine is the only New England state that employs more in the nondurable goods industries than in durable goods. New Hampshire with 69.0 percent of the manufacturing employment in durable goods was third in New England. Machinery with 25,800 workers is the leading industry in manufacturing followed very closely by electrical products with 25,550 workers. In 1985 durable goods with 84,200 workers had 68.4 percent, whereas nondurable goods with 38,850 workers had 31.6 percent of all manufacturing (see Table 9).

Comparative growth of manufacturing employment in New Hampshire and the United States is shown in the table on the following page:

Growth in Manufacturing Industries
New Hampshire and the United States
(in Thousands)

Year	New Hampshire		United States*	
	Average Employment	Percent Change	Average Employment	Percent Change
1974	94.2	-1.9	20,077	-0.4
1975	85.1	-10.7	18,323	-9.6
1976	94.5	11.0	18,997	3.7
1977	101.5	7.4	19,682	3.6
1978	109.8	8.3	20,505	4.2
1979	116.5	6.1	21,040	2.6
1980	116.6	0.5	20,285	3.6
1981	116.6	0.0	20,170	-0.6
1982	111.7	-4.2	18,781	-6.9
1983	113.4	1.5	18,434	-1.8
1984	123.4	8.8	19,412	5.3
1985	123.1	-0.2	19,426	0.1

*SOURCE: Employment and Earnings, May 1986 Vol. 33, No. 5, Table B-1, pg. 45.

The loss of employment in manufacturing in New Hampshire resulted from job losses of 2,200 in textile mill products and leather products and another 1,200 jobs in electrical products. The machinery industry had a gain of 1,650 in 1985 and at the same time became the leading manufacturing industry in terms of employment. The problems in the textile and leather industries continue to affect the economy of the state and the nation and no viable solution appears on the horizon because of the fear of endangering foreign trade. The national employment change in manufacturing felt its more minimal positive increase in over a decade. This is the first time since 1980 that the United States had two successive years of employment gains in manufacturing.

The growth of the trade and service industry divisions combined continues to increase in New Hampshire at a pace which is much faster than the national average. As shown in the following table, the overall growth in our state for the decade 1976 through 1985 was 66.7 percent compared with the nationwide rate of 40.0 percent. Although the percent changes have decreased since last year, these two industry divisions make up the largest part of nonagricultural employment in New Hampshire.

Growth in Trade and Services
New Hampshire and the United States
(in Thousands)

Year	New Hampshire		United States*	
	Average Employment	Percent Change	Average Employment	Percent Change
1974	117.8	2.8	30,428	3.2
1975	120.3	2.1	30,952	1.7
1976	127.2	5.7	32,306	4.4
1977	136.0	7.0	33,819	4.7
1978	145.5	7.0	35,794	5.8
1979	153.1	5.2	37,305	4.2
1980	157.9	3.1	38,200	2.4

pg. 45.

VI. EMPLOYMENT INFORMATION BY OCCUPATION (TABLES 28-29)

The average rate of growth for all workers is 3.9 percent over the period 1983-1995. Two major occupational groups are projected to have the largest annual growth rate with 5.0 percent, engineers, architects and surveyors and the hand working occupations (assemblers and fabricators). The marketing and sales occupations with an annual growth rate of 4.9 percent is ranked second. The administrative support occupations with a projected annual growth of 3,065 worker is ranked first when comparing the major occupational groups by number of annual openings due to growth.

The following table shows the twenty four occupations that have a growth rate of 6.0 percent or better which is somewhat higher than the average of 3.9 percent.

Occupations with Annual Growth Rates of
6.0 Percent or Better

<u>Occupations</u>	<u>Annual Growth Rate</u>
Electrical & Electronic Equip. Assemblers	7.8
Watch and Clock Assemblers	7.8
Data Entry Keyers, Exc. Composing	7.6
Employment Interviewers, Private or Public	7.4
Coil Winders, Tapers and Finishers	7.3
Instructors & Coaches, Sports & Phy. Trng.	7.1
Painting, Coating and Decorating Hand Workers	7.0
Computer Systems Analyst, EDP	6.8
Artists and Commercial Artists	6.8
Electrical & Electronic Assemblers	6.8
Upholsterers	6.8
Electrical & Electronics Engineers	6.7
Writers & Editors, Inc. Technical	6.7
Peripheral EDP Equipment Operators	6.4
Extruding & Drawing Mach. Setters, Set-Up	6.4
Marketing, Advertising Managers	6.3
Sales Engineers	6.3
Bakers, Manufacturing	6.2
Precision Inspectors, Testers & Graders	6.2
Metal Pourers and Casters, Basic Shapes	6.2
Industrial Engineers, Exc. Safety	6.1
Solderers and Brazers	6.1
Teachers, Preschool	6.0
Numerical Control Mach. & Tool Oper. & Tend.	6.0

NOTE: Restricted to occupations with employment of 100 or more in 1983.

The following table lists those occupations whose number of annual average job openings due to growth are over 200 per year.

Occupations Projected to Have
The Greatest Numerical Growth

<u>Occupations</u>	<u>Annual Growth</u>
Salespersons, Retail	638
Cashiers	481
Secretaries	467
Janitors, Cleaners and Maids	454
Waiters and Waitresses	440
General Office Clerks	384
Stock Clerks, Sales Floor	365
Bookkeeping, Accounting & Auditing Clerks	320
Registered Nurses	304
Teachers, Kindergarten and Elementary	300
Truck Drivers	285
Assemblers and Fabricators	253
Teachers, Secondary Schools	226
Food Preparation Workers	222
Electrical & Electronic Assemblers	205
Electrical & Electronics Engineers	201

VII. UNEMPLOYMENT INFORMATION

a) Trends in Unemployment (Tables 6-7, 21-22)

Annual average unemployment for the state in 1985 was 21,000 with an unemployment rate of 3.9 percent. New Hampshire tied with Massachusetts for the lowest rate in 1985 of all the states. The unemployment levels for the first five months of 1986 have continued to drop, keeping our state's rate among the lowest in the country. Projected unemployment for FY 1987 is 27,797 with an unemployment rate of 4.9 percent. The male labor force is expected to have an unemployment rate of 5.3 percent, while the female labor force is anticipated to be at 4.3 percent.

Table 7 shows that an estimated 99,030 different individuals will be unemployed during some point in FY 1987. Of those unemployed workers, males will account for 58.2 percent. The number of long-term unemployed is projected at 6,205 with only 21.0 percent of those expected to be female. Hillsborough and Rockingham counties combined will account for nearly half of the long-term unemployed.

New Hampshire exhaustees for the 1985-1986 benefit year (Table 22) totaled 450 with 215 or 47.8 percent male. Approximately fifty-seven percent of the exhaustees were between 22 and 44 years of age. More than half of the exhaustees received a weekly benefit amount of \$114 or over. When comparing by industry group, manufacturing had 207 exhaustees, with half of those in the durable goods industries. Table 21 shows the breakdown by state and counties.

b) Insured Unemployed (Tables 23-25)

The data on insured unemployed are based on information as of April 1986.

The total insured unemployed in the state dropped for the second year in a row. This decrease of about 550 since April 1985 was mostly in the female sector. They now represent less than half of those unemployed, this is a reversal from last year. As has occurred in the past, in the manufacturing industries the majority are female and in the nonmanufacturing industries the majority are male. Construction and mining, which is predominantly male, is mainly responsible for so many more males being unemployed in the nonmanufacturing sector.

Table 24 shows that by major occupational classification, the professionals account for 20.2 percent and benchwork for 18.8 percent of the insured unemployed. These two groupings also had the most drastic changes in their percent distribution over April 1985. As for the number of weeks unemployed, 69.3 percent were out of work for either a very short period (1-2 weeks) or a long period (5-14 weeks).

The age group of 25-34 year olds had 1,026 insured unemployed which is 31.4 percent of the total, up slightly over last year. The same age group for the women accounted for 30.7 percent of the total female unemployed.

c) Employment Service Job Openings

A total of 29,664 nonagricultural job openings were received by the New Hampshire Job Service during Program Year 1986. During this same period, the Employment Service Section of the Department of Employment Security placed 12,920 applicants with a placement ratio of 43.6 percent. Slightly over half of all job openings received were in the clerical, services and structural occupations. Those applicants that were classified as benchworkers had the highest placement ratio at 56.7 percent while those in fishing, farming and forestry were the most difficult to place with a ratio of 19.5 percent.

New Hampshire Nonagricultural Openings
Received and Filled
July 1, 1985 - June 30, 1986

Occupational Category	Nonagricultural Openings Received	Nonagricultural Openings Filled	Percent Filled
Prof., Tech. & Mgr.	1,303	363	27.9
Clerical	5,068	2,090	41.2
Sales	1,950	730	37.4
Services (inc. domestic)	6,104	2,493	40.8
Fish., Farm. & For.	1,214	237	19.5
Processing	685	343	50.1
Machine Trades	2,401	1,088	45.3
Benchwork	2,221	1,259	56.7
Structural	5,189	2,541	49.0
Miscellaneous	3,529	1,776	50.3
Total	29,664	12,920	43.6

The following table shows the relationship between Active Applicants and Nonagricultural Openings Received for the quarter ending June 30, 1986 in New Hampshire. The professional, technical and managerial group continue to have the highest applicant per opening ratio with 4.1 percent while the fishing, farming and forestry group had the lowest ratio with 0.2 percent. The state average at 1.2 percent indicates the difficulty employers are having at finding qualified workers from the very small group that is available.

Active Applicants and Nonagricultural Openings Received
for the Quarter Ending June 30, 1986

Occupational Group	Active Applicants	Nonag. Openings Received	Applicants Per Opening
Prof., Tech. & Mgr.	1,434	349	4.1
Clerical	1,835	1,131	1.6
Sales	472	534	0.9
Services (inc. domestic)	1,578	1,675	0.9
Fish., Farm. & For.	113	506	0.2
Processing	154	166	0.9
Machine Trades	769	611	1.3
Benchwork	1,012	605	1.7

Miscellaneous	835	1,041	0.8
Total	9,516	8,096	1.2

SOURCE: ESARS Tables 10 and A96.

VIII. ESTIMATES OF NEEDS FOR MANPOWER SERVICES (TABLES 7, 14-18)

Manpower services will be of prime importance to unemployed workers, especially the long term or hard core unemployed individuals, those employed part-time for economic reasons, the youth group and the poor or economically disadvantaged.

It is estimated that 99,030 individuals will be unemployed at some time during Fiscal Year 1987 of which 6,205 will be unemployed for 15 weeks or more. Many of these will need help in finding employment. Some may also require retraining before reentering the labor market. Women make up 41.8 percent of the total unemployed but only 21.0 percent of the long-term unemployed. These statistics have dropped significantly over last year.

There will be an estimated 104,725 poor persons during FY 1987. Services will be needed by these people. Individuals less than 18 years old account for approximately 26 percent of the total population of the state but 33.5 percent of the economically disadvantaged. The number of cases receiving welfare assistance averaged 18,504 for 1985.

Persons employed part-time for economic reasons are another group that needs special attention. Some of the cause for individuals working on a part-time basis are material shortages, slack work, the inability to find full time work and lack of transportation to be able to enlarge their job hunting geographical area. Females comprise 46.6 percent of the total employment while their share of the part-time employed rises to 59.2 percent due to the fact that there are more part-time jobs for females than males.

The youth group is usually considered to be the one most in need of manpower services. The table on the following page shows the employment, unemployment and the unemployment rate of the 16-21 year olds that make up the youth group.

New Hampshire Employment and Unemployment
for Youth 16-21 Year Olds
May 1986

Area	Labor Force	Employment	Unemployment	Unemployment Rate
New Hampshire	70,460	66,470	3,990	5.7
Belknap	2,710	2,540	170	6.3
Carroll	1,530	1,450	80	5.2
Cheshire	4,360	4,130	230	5.3
Coos	2,220	1,830	390	17.6
Grafton	5,070	4,770	300	5.9
Hillsborough	23,270	22,090	1,180	5.1
Merrimack	6,570	6,390	180	2.7
Rockingham	13,900	12,930	970	7.0
Strafford	8,880	8,520	360	4.1
Sullivan	1,950	1,820	130	6.7
Bal. of State	47,190	44,380	2,810	6.0

Some of the possible causes for the unemployment rates on the above chart are: the lack of educational levels required, lack of employable skills and experience and little know-how in the details of job search or preparation for job interviews. Assistance is also needed in determining the labor market situations by industry and area together with being furnished information concerning prevailing wage and rate and job requirements. There is a tendency on the part of the youth group to leave and reenter the labor force more often than the older age groups.

New Hampshire having a greater percentage of rural environment than many other states, has transportation and geographic problems which are accentuated, especially in the northern counties.

15	Metal Pourers and Casters, Basic Shapes	25.2	139

*Restricted to occupations with employment of 100 or more in 1983.

GLOSSARY

Annual Average The aggregate of 12 months data divided by 12. Annual Average data are commonly used for projections and other long-term analysis.

Applicant A person who contacts a local office of the Department of Employment Security to seek employment or obtain employability development services.

Average Hourly Earnings Average weekly earnings divided by average weekly hours.

Average Weekly Earnings Average total money earnings of production or non-supervisory workers in the survey week, including overtime, paid vacation and sick leave.

Balance of State New Hampshire minus Hillsborough County.

Benchmark Most economic time series utilize a sample trend made of the best available data at the time. Periodically the series are adjusted due to more complete information being available. This periodic adjustment is a Benchmark Revision and the point-in-time for which the more complete data was available is the Benchmark Date. Data is commonly referenced by their benchmark date, e.g., "data based on a March 1985, benchmark."

Civilian Labor Force See Labor Force.

Consumer Price Index (CPI) This index is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by CPI-U. The CPI is based on prices of food, clothing, shelter and fuels, transportation fares, charges for doctors' and dentists' services, drugs and other goods and services that people buy for day to day living.

Covered Employment Employment in an industry that falls under the coverage of the respective state's unemployment insurance program. In most states presently only agriculture, the self-employed, some employed students, religious organizations, full commissioned salesmen and elected and appointed officials have significant numbers of noncovered workers.

Current Employment Statistics (CES) Estimates of nonagricultural wage and salary employment and production workers hours and earnings by industry. CES produces these estimates monthly for each state and MSA from a sample of employing establishments in cooperation with the Bureau of Labor Statistics.

Current Population Survey (CPS) A monthly household survey of the population of the United States. This survey of 60,000 households is the data source for the national estimates of labor force composition. Some CPS data is also incorporated into the state and area labor force estimating procedures to improve interstate comparability.

- Definitions -
- (1) Manchester MSA: city of Manchester and the towns of Allenstown, Auburn, Bedford, Candia, Goffstown and Hooksett.
 - (2) Nashua PMSA: city of Nashua and the towns of Amherst, Brookline, Hollis, Hudson, Litchfield, Londonderry, Merrimack, Milford, Mont Vernon and Wilton.
 - (3) Portsmouth-Dover-Rochester MSA: cities of Dover, Portsmouth, Rochester and Somersworth and the towns of Barrington, Durham, Exeter, Farmington, Greenland, Hampton, Lee, Madbury, Milton, New Castle, Newfields, Newington, Newmarket, North Hampton, Rollingsford, Rye and Stratham, Maine Portion - Berwick, Eliot, Kittery, N. Berwick, S. Berwick, Wells, York and Ogunquit
 - (4) N.H. Portion of Lawrence-Haverhill PMSA: towns of Atkinson, Brentwood, Danville, Derry, East Kingston, Hampstead, Kingston, Newton, Plaistow, Salem, Sandown, Seabrook and Windham.

Note: MSA represents Metropolitan Statistical Area and PMSA represents Primary Metropolitan Statistical Area.

Discouraged Worker Persons who want to work but made no attempt to find work in the past four weeks because of a belief that they could not find employment. Discouraged workers are not counted among the unemployed.

DOT Codes An occupational coding structure based upon job traits and relationships. The codes are published in the Dictionary of Occupational Titles.

Economically Disadvantaged An individual whose immediate family either receives cash welfare payments or whose annual income falls below the current Poverty Income Guidelines.

Educational Attainment Highest grade of school completed.

Employment by Place of Residence An estimate of the number of persons employed who live within a given labor market or other geographic area. All persons who worked for pay and unpaid family workers who worked at least 15 hours or more in the survey week are included, as are workers who were temporarily absent from their job due to vacations, labor disputes, etc.

Employment by Place of Work An estimate of the number of jobs filled in the survey week within a given area. Multiple job holders are counted for each job. In most states only the nonagricultural wage and salary workers are tallied by place of work. Labor disputants are not included in the estimates of employment by place of work.

Employment Security Automated Reporting System (ESARS) A computerized tally of all Job Service activities, job applicant and job openings characteristics.

Entry Level Job A beginning job that requires little or no experience, but may require a minimum amount of training or education for a specific position.

Hard-to-Fill Job Openings Job openings which have gone unfilled for a month or more. Some of the openings may be difficult to fill because of the job environment, wage scales or lack of qualified workers.

Hard-to-Place Applicant An applicant who is unable to be placed in a job due to (1) a lack of demand or (2) a lack of qualifications for a particular job.

High Demand Occupation Occupations which have a substantial number of job openings both in absolute terms and relative to the number of job applicants for that occupation. High demand may be the result of either high growth, high turnover and sometimes by a combination of the two.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South America, or other Spanish culture or origin regardless of race.

Index or Index Number A measure of relative growth compared with a base figure of the same time series. In index form the base period is set equal to 100, and data for other periods are expressed as percentages of the base value. Plural is indices.

Insured Unemployment A count of persons who have filed claims for state unemployment insurance benefits.

Insured Unemployment Rate An administrative tool which is the ratio of insured unemployment to covered employment lagged about 6-9 months.

Job Bank A computerized system which provides rapid dissemination of job orders throughout a network of Employment Division local offices.

Job Corps A national system of 60 residential centers in 31 states and Puerto Rico providing basic education, vocational training, counseling, health care, and other services to help disadvantaged young men and women, age 16 through 21, prepare for jobs and responsible citizenship.

Job Training Partnership Act (JTPA) An act which replaced the Comprehensive Employment and Training Act on 10/1/83. This act provides a new program and delivery system to train economically disadvantaged persons and others for permanent private sector employment. The training programs are administered by the State and planned and carried out through a partnership between the private sector and government at the local level. Programs include adult and youth training, training and placement assistance for dislocated workers and federal administered activities including programs for Native Americans, migrant and seasonal farm workers, veterans, labor market information, Job Corps and other national activities.

Labor Force All persons 16 years and older who are either employed or unemployed. Normally published as a civilian labor force by place of residence (See Employment by Residence).

Labor Market Area An area with a central community and economic concentration in which workers can generally change jobs without changing their residence. In most states labor market areas are either counties or groups of counties.

Labor Market Information (LMI) Data on a broad range of topics such as labor force, employment by industry and occupation, unemployment, population, earnings, wages, hours worked, training programs and labor turnover.

Metropolitan Statistical Area: A grouping of cities and towns with a total population of at least 75,000 or a central city of at least 50,000 with an urbanized area of at least 50,000 inhabitants.

Minority Group All races other than white, and the Spanish-American ethnic group.

Multiple Job Holders Persons who simultaneously work more than one job.

Nonagricultural Wage and Salary Employment Place of work employment that does not include the self-employed, unpaid family workers, domestics or agricultural workers. Conceptually this is probably the most consistent economic time series available to compare different labor markets over an extended period of time.

Non White Group All persons who identified themselves as Negro, American Indian, Chinese, Japanese, Filipino, Korean, or other races in response to survey or census questions.

Occupational Employment Statistics (OES) A program which produces occupational data for major industries once every three years. Projections by occupation are made which aid educators and other occupational planners.

Part-time Work Work that is less than 35 hours per week.

Per Capita Income Total personal income divided by total population.

Personal Income, Total Private and government wage and salary payments in cash and in kind, other labor income, farm and nonfarm proprietors' income, interest, net rents, dividends and transfer payments, less personal contributions for social insurance. It is measured before the deduction of personal income and other personal taxes. Dollars are not adjusted for change in consumer price index.

Primary Metropolitan Statistical Area: A large urbanized county or group of counties with socio-economic ties and at least one of these counties has a population of more than 100,000.

Qualified Applicant An applicant who meets education, experience, and performance standards for a job opening. These standards are set by the employer.

Seasonal Adjustments Minimizes the changes in any time series from normal annual occurrences, such as Christmas, summer vacations and weather. After seasonal adjustment any month can be compared with the annual average, or any other month and differences should then be due to economic trends or unusual occurrences. Seasonally adjusted data more accurately portrays underlying economic trends, but should not be used where the current level is more important to the data user than the economic trend. No meaningful seasonal adjustment exists for annual or annual average data since the purpose is to make monthly or quarterly data comparable to the annual average data.

SIC Codes Standard Industrial Classification code structure in which all establishments are classified by a four-digit code according to their primary economic activity. Frequently references will be made to SIC codes at the 1, 2, or 3 digit levels when a less specific classification is useful.

Survey Week The week that includes the 12th of the month is used as a reference period for most labor force data.

Time Series A set of consistent economic quantitative data collected at periodic intervals (most labor market information is monthly, but weekly and annual data is published for some items).

Total Employment A count of persons, residing in an area, who worked for pay or profit during the reference week including the 12th of the month or had a job from which they were temporarily absent because of illness, vacation, labor dispute, or other reasons not reflecting a shortage of work, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family.

Total Unemployment A count of persons, residing in an area, who did no work at all during the reference week including the 12th of the month, but were seeking work or awaiting recall from layoffs or the beginning of a new job within the next 30 days. This count includes persons receiving unemployment insurance benefits, those who have delayed filing for benefits but were eligible to receive them, those unemployed who have applied for benefits but were not eligible to receive them, unemployed workers who exhausted benefits in the current benefit year, unemployed workers from industries not covered by unemployment insurance and unemployed persons newly entering or reentering the labor force.

Types of Unemployment

- Frictional - Unemployment that is frictional in nature i.e., short-term unemployment encountered in searching for a job, or from a temporary layoff.
- Structural - Unemployment that is structural in nature i.e., mismatch between the skill requirements or existing job openings and the skills possessed by the current unemployed.
- Cyclical - Unemployment that is cyclical in nature i.e., deficiencies in aggregate demand exist resulting in a level of labor demand that falls short of the available supply of workers.

Underemployment A term that includes both persons who are working part-time who would prefer full-time work, and persons working full-time in an occupation which does not utilize their skills derived from prior training or experience.

Unemployment Persons who were not employed during the monthly survey week but were available for work and had either (1) overtly engaged in a job seeking activity within the four week period up to and including the survey week; (2) were waiting to be recalled from a layoff; or (3) were waiting to report to a new wage and salary job within 30 days.

Unemployment Rate The number of unemployed persons expressed as a percentage of the labor force. Commonly the seasonally adjusted unemployment rate is referred to as the unemployment rate and it is usually the only rate quoted in the monthly news release on the U.S. unemployment situation (see Seasonal Adjustment).

Urbanized Area A geographical area where the population density is at least 1,000 persons per square mile.

Vietnam Era Veteran (VEV) Any person who served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964, and May 7, 1975, and was discharged or released with other than a dishonorable discharge; or was discharged or released from activity duty for a service-connected disability if any part of such duty was performed between these dates.

Work Incentive Program (WIN) Counseling, training, job development and supportive services are provided to employable recipients of Aid-to-Families-with-Dependent-Children (AFDC). The object is to place AFDC recipients into suitable employment.
